Thanks Jane. I have a conflict at 10am. I'd like to hear Jared's impressions at some point though. I think Mike and/or I could cover this, and it might be a good opportunity to add a separate check in on UIC matters. David

Mark Nechodom is on leave all next week. Jason Marshall is available anytime after 10:00 on March 26. Steve is available except for 11:00-12:00. So, the meeting could be 10:00 or in the afternoon. I will talk with Mike at his 10:00 update about which of us will join Teresa (and Jared's impressions from her call with RAs last week), so feel free to join for that conversation if you are free. If not, let us know if you have a preference/recommendation, let me know.

I know they are keen to have her talk with both, but maybe it could be at Jon Bishop's level? Mary actually mentioned that Jon was just in Philadelphia representing CA at an NGA event where there was specific discussion of unconventional oil and gas. Just a few thoughts. David

You'll have probably seen by now the note from Matt Rodriguez saying he met Teresa at ECOS and recommended she talk with Mark. Based on Jared's guidance and the fact that she's looking at an hour meeting, I think I will schedule with only Mark and forget about CalEPA. If we learn something different on Thursday about her agenda that suggests there's a reason to pull in CalEPA or SWRCB, we can always see about adding that. I will reach out to Mark's scheduler and will look at your, Mike's and my calendars to see which of us might be able to join her.

Hi Jane,

I just spoke to Mary Hanley about Teresa's visit and she asked that the Region reach out to the State (as you've done) but also to try to pin down a specific day/time for the meeting and let them know. It seems like a joint meeting with both Env and Oil&Gas together is probably best. Teresa can do the 26<sup>th</sup> or 27<sup>th</sup>, but prefers the 26<sup>th</sup> if possible. Mary thought a one-hour meeting time would suffice. Do you want to reach back out to Mark and Matt on this? Let me know if you want to discuss. Also, I am working to pull together some materials to send tomorrow in advance of our call Thurs.

David

Gentlemen--We recently learned of the appointment of a new senior advisor to EPA Administrator Gina McCarthy on unconventional oil and gas. Her name is Teresa Marks. We will have a chance to fill Teresa in on CA's program by phone on Thursday, but wanted to give you a heads up that she we understand she will be seeking a meeting with CA officials next week (among trips to other States). I think she is interested in introducing herself and talking further about what EPA's Office of Research and Development is doing, following up on past visits by ORD's Ramona Trovato. As we learn more about her plans, we'll let you know, including who from our office may join in the conversation. Also, please let us know if you become aware of a confirmed meeting. Thanks, Jane
